

Guidelines for Footnote Affiliation Style

for Research Articles, Reviews, and special issue Reviews and Perspectives

- The author affiliations will appear as a list of sequentially numbered footnotes in a single paragraph, where each organization is listed only once. The order of the organizations (and of the departments/divisions within the organization) in the footnotes is based on the order of the author list. The first author will always have footnote 1, and the remaining affiliations should be arranged such that each footnote's first use in the author list appears in numerical order. Authors may have more than one footnote number corresponding to multiple affiliations. Multiple numbers are separated by commas with no space between the comma and following number (see example 1).
- Organizations are numbered in order according to the order of the author list, and if multiple divisions/departments at that organization are cited, they are ordered according to order of the author list as well. Organization, city, and country are listed for each department or division. Postal codes and street addresses are not required but may be included. In the case of US affiliations, if some include the zip codes and others don't, request the missing zips for consistency (and note that four-digit zip code extensions may be omitted).
- List two or more departments/organizations together if they are always cited together with the same physical address (see example 2). Join two items by "and" (e.g. "Departments of Physics and Chemistry,..." or "Department of Biology and Howard Hughes Medical Institute, ..." Separate three or more items by commas.
- Retain author's preferred order of affiliations by ordering footnote numbers accordingly (e.g., J. Daniels^{5,3}) (see examples 1 and 2).
- Symbols will be used for informational footnotes regarding corresponding author, present address, etc. These will appear after the numbered affiliation footnotes by the author's name (e.g., T. Crow^{1,3*}).
- Symbol footnotes do not refer to numbered footnotes. Repeat information if necessary. Order: † ‡ § ¶ # ** †† ‡‡ etc. As of the 4/9/21 issue, the * symbol will be used specifically to denote the corresponding author(s). Thus, this symbol will not have a fixed order in the author list or the footnotes.
{†[ALT+0134], ‡[ALT+0135] §[ALT+0167], ¶[ALT+0182], #[SHIFT+3]}
- All manuscripts require at least one corresponding author. If none has been designated in the author list [or in other communication from the author(s)], add the * symbol to the name listed in CTS as the corresponding author and provide the email address.
- For a single author, there is no need to use a separate footnote for the email address. Before making the XML file, put the email address in a separate paragraph and style it as Correspondence.
- For Articles, Research Articles, Reports, and Policy Forums, job titles (e.g., Royal Society University Research Fellow) should not be included in the author footnotes.

Move these to the acknowledgment note (e.g., “R.J.C.G. was a Royal Society University Research Fellow”).

- Do not allow designations of co-senior authors; change to “These authors contributed equally to this work.”
- It is not necessary to spell out institutional acronyms, the names of Canadian and Australian provinces, P.O. Box, or street abbreviations (e.g., Ave., Blvd., NW). But retain spelled-out forms if supplied by the authors. US state names, USA, and UK should never be spelled out.
- For treatment of consortium authors, see the examples listed in Group.Author.Instructions.docx (can be found at S:\COPYED\Procedures).

General Examples of Footnote Affiliation Style

Example 1: Note preferred order of affiliation for Richi.

I. Kuro^{1,2*}, G. Qu^{1,2}, S. Kyoto¹, K. Suzuki¹, H. Myoto^{1*}, M. Richi^{3,2}

¹Institute of Materials Science, University of Tsukuba, Tsukuba, Ibaraki 305-8573, Japan.

²Center of Tsukuba Advanced Research Alliance, University of Tsukuba, Tsukuba, Ibaraki 305-8573, Japan. ³National Institute of Materials and Chemical Research, Tsukuba, Ibaraki 305-0046, Japan.

*Corresponding author. Email: kuro@tsukuba.ac.jp (I.K.); richi@ims.tsukuba.ac.jp (M.R.)

Example 2: List two or more departments together if always cited together (see Major and McGill).

S. Zou^{1†}, J. Russo^{2†}, M. Rothberg^{2,3}, P. Smythe^{4,2}, R. Major⁵, P. McGill⁵, D. Bramble³, I. Goldberg^{1*}, C. Herbert^{3‡}

¹Department of Biochemistry and Biophysics, University of California, San Francisco, CA 94143, USA. ²Department of Biochemistry, Stanford University School of Medicine, Stanford, CA 94305, USA. ³Department of Genetics, Stanford University School of Medicine, Stanford, CA 94305, USA. ⁴Howard Hughes Medical Institute, Stanford University School of Medicine, Stanford, CA 94305, USA. ⁵Departments of Biochemistry and Genetics, University of Toronto, 25 Willcocks Street, Toronto, Ontario M5S 3B2, Canada.

†These authors contributed equally to this work.

*Corresponding author. Email: igoldberg@ucsf.edu

‡Present address: Department of Chemistry, Arizona State University, Tempe, AZ 85387, USA.
